- The ITCC   th Annual State of Agile eport has found that   of Certified SAFe professionals have seen a greater demand for their skills in the job market since they got SAFe certified

Cognixia's Leading SAFe® . Training SAFe® Agilist Certification

Cognixia's Leading SAFe® course introduces participants to the foundations of SAFe and imparts guidance on the principles & practices that would drive the Lean-Agile transformation. It offers valuable tools to lead effectively in both remote & hybrid environments. The course helps one gain a deeper understanding of how companies can build business agility and how SAFe can be implemented in the organization.

This course will focus on how SAFe helps improve quality, employee engagement, productivity, and time-to-market. It empowers participants with the skills they need to align their organization toward common goals & objectives. It will also make them proficient in improving the generation of value and the flow of work from strategy to delivery. Additionally, it will shed light on what makes companies more customer-centric while also helping participants explore how to run SAFe alignment and planning events, such as PI planning.

Who Should Take This Course?

The course is an ideal fit for anybody looking to learn how to coordinate and lead a lean-agile transformation in their organization. It is intended for leaders of lean-agile change initiatives to develop a lean-agile mindset and apply these principles & practices to support agile teams, programs, as well as program portfolio efforts of the organization.

Prerequisites

The Leading SAFe course is open to everyone, regardless of their experience.

However, it is highly recommended that those intending to appear for the SAFe® 5 Agilist (SA) certification exam have:

- At least 5 years of experience in software development, testing, business analysis product, or project management
- Prior work experience in Scrum

Program Structure

- 16 hours of live online instructor-led training
- Industry experienced instructor
